

Star Water Company
PO Box 7
Star, Ms 39167

Dear Star Water Company Customer

Star Water Company has received a grant to upgrade the distribution lines in our system. Some of our lines are of a brittle material that break frequently, while others are undersized to maintain water pressure. The grant will cover all the construction costs, and your Star Water Company Board of Directors feel it necessary to accept it in order to correct many of the deficiencies in the distribution system and enable the system to support growth for many years. This project will, obviously, involve construction work on the properties where the lines are installed.

Customers and property owners receiving this letter have been identified as potentially being affected by the construction crossing their property. The Water Company will need an easement to install the new lines on your property. We understand the concerns and questions you might have about this process.

An engineer with Heflin Engineering, the firm managing the project, will be at Star Fire Department on Tuesday, February 11, 2025 at 6:30 pm to explain the process and answer questions you might have. You are encouraged to attend this meeting if at all possible. You will be contacted soon about signing an easement for the new lines and this meeting will help you understand how it will affect you.

Thank You,
Star Water Company
Board of Directors
